

Morsø 5460 Convector

A choice for life.

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year. To choose a Morsø is, in other words, to make a choice for life.

The new design brings out the positive characteristics of cast iron in every way, and integrates the advanced combustion chamber very elegantly with the other elements.

The shape of the stove is therefore designed as a simple box, which opens out towards the observer, while the ribs at the sides give the oven an expression of strength and power. At the same time the large front section in black glass and the simple forms behind it give the stove a lightness, which might remind one of an iPhone in appearance, in contrast to the rough and robust aspect of the cast iron.

Rated output: 6,2 kW
 Log length: 30 cm
 Flue outlet, rear and top option, internal \varnothing : 120 mm
 Weight: 125 kg
 Efficiency net/gross: 81%/73.7%

EN 13240 and Norwegian approved

Clearance to Combustibles:

Sides: 400 mm
 Rear: 250 mm
 Floor: 350 mm
 Optional outside air kit available
 Wood Burning
