

Amesti Rondo 490

Manufactured in Chile, a country of extreme weather, these fireplaces have been heating homes successfully for over 20 years. By combining high quality materials with contemporary design, Amesti has created steel fireplaces that are efficient, durable and affordable. Amesti fireplaces light easily, prevent smoke and sparks from entering the house, and provide an optimal view of the fire. Once lit, your fireplace will heat quickly, and warm your home for hours with minimal wood. The double combustion system can be controlled easily with one lever, and the specialized glass does not require cleaning due to the air wash system. The extreme heat in the firebox incinerates the wood, therefore ash need only be emptied once per month

- Heat Output: 15kW
- Flue Size: 150mm
- Flue Options: Top Only
- Width: 600mm
- Height: 930mm
- Depth: 490mm
- Efficiency (%): 74
- Heatable Area: 190m²
