

## Franco Belge Limousin

The Limousin is one of the larger stoves in the Franco Belge range. The expansive glass door is kept as clear of deposits as possible by a strong air wash system. An outstanding feature of this stove is the additional side loading door which will enable you to fit in logs of up to 50 cm in length to produce maximum usage from your wood stocks. Options include a brass finish door to create an individual look in your home and a 10,000Btu/hr output boiler can be installed to provide plenty of hot water to your home - this can also be retrofitted at a later date if required. There is even a model with a lift up cast iron lid revealing a steel cooking hot plate, ideal for some traditional home cooking. The Limousin is ideal for larger rooms and for homes that require a substantial heat output

- W x H x D: 638 x 741 x 433
- Max Capacity: 10kW
- Heating Area: 400m<sup>3</sup>
- Outlet Ø: 150mm
- Weight: 160kg
