

Franco Belge Montfort Elegance

The Montfort Elegance takes all the great characteristics of the original and builds on this heritage to create an all new and individual stove. As a 'room-sealed' stove, the Montfort Elegance can draw its primary air supply from outside your home. Now DEFRA* exempt, the Montfort Elegance can be used to burn wood in smoke controlled zones by simply adding the optional DEFRA* kit before installation. With a Vermiculite lining, powerful air wash system to keep the large glass door panel clear of deposits and a heat output up to 5 kW the Montfort Elegance is the ideal stove for bringing a warm glow to any family living room. Available in traditional matt black and a wide range of stunning enamel finishes to complement your décor.
