

Franco Belge Savoy Classic

The Savoy Classic is the bigger sister to the Montfort. The Savoy Classic benefits from having the largest ceramic glass door for a stove of its size, this provides excellent views of the fire. The Savoy Classic has an output of 8 kws which makes it ideal for providing a substantial amount of heat in a variety of rooms. However due to its compact dimensions this appliance is suitable for a wide range of installations. An optional glass lined boiler is available for extra hot water in your home (top exit installations only, not suitable for side loading door model). The boiler can be installed at the same time as the Savoy Classic or at a later date should you decide that an additional boiler would be a useful in your home. For a unique look the Savoy Classic has an optional brass trim door on the matt black model only.
