

Morsø Ø6

A choice for life.

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year. To choose a Morsø is, in other words, to make a choice for life.

There can be no better example of functionality and form than the Morsø Ø6 Multi fuel stove. Sleek lines and sophisticated style, the Ø6 features the new Easy Clean ash disposal system (featured inset), making this one of the cleanest stoves in today's modern market.

The Morso O6 is capable of burning most smokeless fuels as well as logs of up to 375 mm in length. Featured also is the Fire-Slide control, allowing the O6 to burn for very long periods on a single charge of fuel.

In use, the O-Collection is unparalleled. The simple 'no fuss' chrome-iron grate system allows all models to burn most smokeless fuels, peat and of course seasoned logs. Full and precise regulation of the fire is maintained with the use of the unique Fire-Slide control system. With a single action of the Fire-Slide control, preheated primary, secondary and tertiary combustion air can be either drawn into the stove or reduced depending on your heating requirements.

Carefully designed air manifolds within the firebox ensure that the combustion air is delivered to the fuel in just the right mix, making sure of highly efficient combustion rates, low level smoke emissions and an extremely clear glass.

Rated output:	6kW
Heat output range:	3-8kW
Heats up m ² :	120m ²
Height:	633mm
Width:	497mm
Depth:	431mm
Flue diameter:	150Ø
Weight:	110kg
