

Morsø Ø8

A choice for life.

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year. To choose a Morsø is, in other words, to make a choice for life.

The Morso O8 multi fuel stove is designed with the larger room in mind, the O8 will add a touch of class to almost any interior designer's concept. Smooth lines coupled with double doors, makes this piece of 'heating furniture' fit into the classic-modern category in design.

Incorporating the Fire-Slide control, the O8 is capable of many hours of unattended burn time. As with all of the stoves from the O-Collection, the in-built clean-burn combustion system will help keep both your chimney and the environment clear of excessive smoke emissions.

'Style and Function' is the main philosophy behind the design, with special emphasis on simple operation and environmental impact.

The style of the O-Collection with the gentle curves, simple lines and uncluttered viewing area makes it suitable for almost any room setting, be it traditional English cottage or New York styled apartment. The look is time-less, peaceful and relaxing, with no fussy decorations to distract the viewer away from the pure contemplation of the flame within.
