

Morsø 1442 Ribbed

A choice for life.

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year. To choose a Morsø is, in other words, to make a choice for life.

Thinking of the environment and wanting to live up to the world's most stringent environmental requirements, Morsø has improved significantly the combustion system of its widely known radiant fireplace, a true Morsø classic. The furnace is fitted with an extra self-regulating chamber that supplies extra air at the top of the stove or fire via a number of ducts. This extra combustion ensures the burning of harmful particles and any excess gases that would otherwise be released into the atmosphere.

Morsø wood burning stove 1442 also uses a unique combustion system, and conforms to the world's most stringent environmental requirements.

It uses the latest stove heating technology including the integrated convection system. The classic Morsø 1442 is available with a squirrel motif or with ribbed sides.

Rated output:	5kW
Heat output range:	3-6kW
