

Morsø S80-90

A choice for life.

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year. To choose a Morsø is, in other words, to make a choice for life.

Attractive fireplace with flat screen effect

It's in-built and it's big; this fireplace resembles an exclusive flat screen TV more than anything else. The new S80 design is a new offering of a stove insert which disseminates heat and cosiness in the home effectively.

With a rectangular design in coal-black glass and a size which leaves all other in-built fireplace inserts standing, the Morsø S80 is without doubt becoming a sought-after new product among Denmark's homeowners. The hinges are hidden discretely in the stove's design, while the large, soot-free glass door ensures a beautiful and uninterrupted view of the flames. The fireplace stands out as an exclusive and hypermodern piece of art, which sets the wall alight and gives style to the furnishing.
