

Morsø S12

The Morsø S12 has a unique modern design featuring tight sharp lines. These clean lines come from the steel construction, which is ideal for flat surfaces, sharp corners and plain joints. The stove door, however, continues to be made from cast iron to give weight and quality to the front of the stove without the characteristics of other steel stoves.

- Heat Output Range: 3-7kW
- Heats up m2: 105m²
- Height: 1040mm
- Width: 464mm
- Depth: 329mm
- Flue exit top/rear: Ø 153mm
