

Nordica 50 Crystal

The Baby of the range, the La Nordica Crystal 50 cassette insert stove still packs a punch giving out a maximum of 7kW. An adjustable automatic fan spreads heat to the room, sucking cool air under the door of this wood burning stove, blowing it through the air gap between the twin skins of the stove, and then back out into the room as warm air through the discrete vents above the door.

- Dimensions: 550 x 500 x 500 mm
- Weight: 90 kg
- Colour: Matt black finish
- Flue Diameter: 125mm
- Max Heat: 7.7 kW
- Direct Air Supply: Yes
