

Scan DSA 7-5

Scan has considerable experience in designing heating furniture. Simple, clean lines are the mark of good Danish design and this makes Scan one of the world's best-selling wood-burning stoves.

Designers have been involved in creating the stoves' appearance as well as how they operate, which is why Scan stoves are so easy to use. Emphasis has been placed on the size of the glass and the efficiency of the air wash system so that everyone can enjoy the sight of the fire burning with all its might

The Scan DSA 7-5 is available in black to be built into existing houses or into new builds. The trims are available in black and can be made to measure if necessary. A black four sided 50mm frame is supplied as standard; other sizes may be supplied upon request. The efficient Scan combustion system is easy to operate, ensuring optimally clean glass and environmentally friendly neutral combustion. The steel handle is extended by the decorative moulding, which gives the insert an exclusive look. The Scan DSA 7-5, with its large combustion chamber, can take extra-large logs.

- Stove colour: Black
- Options: Trims made-to-measure
- Connection piece for fresh air intake \varnothing 100 mm: Yes (bottom, optional extra)
- EN nominal performance (kW *): 7
- Est. operating range (kW): 3-9
- Room size approx. (m³): 75-126
- Efficiency % *): 78
- Emissions (% CO at 13% O₂)*): 0.11
- Max. log length (cm): 56
- Weight (kg): 85
- Fire box opening HxB (mm): 290 x 610
- Flue outlet (mm): \varnothing 155/159 (flue pipe) \varnothing 149 ext.(flexible pipe)
