<i>Coals</i>	7
<i>Pebbles</i>	7
<i>Min. Room size</i>	56m ³
<i>Max. Room size</i>	233m ³

INSTALLATION INSTRUCTIONS

The Picture Fireplace is best viewed at standing height and is designed to fit into an aperture left in a wall that is 160-200mm deep. The hole can also be in a box, built off of an existing wall.

There are two holes positioned in the back of the fireplace for a gas pipe to be led into the fireplace.

The shallow depth of the Picture Fireplace means it is easily added into existing homes without taking up too much space into a pre-existing living area.
